USER REQUIREMENT SPECIFICATION

LEARN-IQ MODULE OF CALIBER EPIQ SOFTWARE						
Document No.	**Revision**	**Supersedes**	**Dated**	**Page**	**Total pages**	**Attachments**
EE/URS/23/022	00	NA	NA	2	21	

1. OBJECTIVE:

The objective of this document is to outline the user requirement specification (URS) of Learn-IQ module of Caliber EPIQ system application software (i.e. Standard Edition of EPIQ 3.1.0) implementation in Encube Ethicals Pvt. Ltd.

2. SCOPE:

This URS Specifies requirements of EPIQ Learn-IQ training software to cater the purpose of personnel training at Encube Ethicals Pvt.Ltd. for Goa site, Indore site and R&D Mumbai site.

3. ABBREVIATIONS & DEFINITIONS:

EPIQ	:	Enterprise Platform for Integrated Quality
Learn-IQ	:	Learning - Integrated Quality
QC	:	Quality control
QA	:	Quality Assurance
ER-ES	:	Electronic record & electronic signature
cGxP	:	cGxP is a general term that stands for current Good “x” Practice (x = Clinical, Engineering, Laboratory, Manufacturing, Documentation, Pharmaceutical, etc.).
GBL	:	Global
FMS	:	Form Management System
IT	:	Information Technology
URS	:	User Requirement specification
IQ	:	Installation Qualification
OQ	:	Operational Qualification
PQ	:	Performance qualification

CSD	:	Configuration Specification Document
cGMP	:	Current Good Manufacturing Practices
21 CFR Part 11	:	Title 21 CFR Part 11 of the Code federal Regulations deals with the United States Food and Drug Administration (FDA) guidelines on electronic records and electronic signatures (ERES)
GAMP	:	Good Automation Manufacturing Practices
AD	:	Active Directory

4. **SUBJECT:**

To define the requirements of Encube Ethicals Pvt. Ltd. for Learn-IQ module of Caliber EPIQ system application software.

a. PROJECT DESCRIPTION:

i. Caliber EPIQ Software shall enable creation, execution and maintenance of entire training records of personnel at site.

ii. It shall allow uploading of training copies and master copies of standard operating procedures along with training questionnaire and answer Key.

iii. System shall allow to create training identification needs based on job role of the individual Personnel.

b. SYSTEM DESCRIPTION:

The task management in Learn-IQ is divided into Sections and Functionalities as follows:

Section 1: System Manager

Functionalities: Register new role, Set global profile, Register Standard Reason, Change User hierarchy, Reason Status Update

Section 2: Course Manager

Functionalities: Defining Topics, Course, Trainer, Training Venue, GTP, Training Schedule, Course Session & Reports etc.

Section 3: Document Manager Functionalities: Document Registration

Section 4: Reports Functionalities: View/Print Reports

The overview of Learn-IQ module of Caliber EPIQ software is described as follows:

- **Purpose of Learn-IQ:**

Addressing the growing needs of organizations.

Evaluating competencies and knowledge sharing of processes and technical know-how.

Storing related documents under a unified platform.

- **Challenges Addressed:**

Handling enormous and complex information generated by various training process functions.

Ensuring secure, faultless, and demonstrably authentic handling of information.

Overcoming human limitations such as tedium, loss of concentration, errors, and redundancies.

- **Role of Learn-IQ:**

Efficiently managing and securing vast amounts of training-related information.

Providing a solution to handle information securely and with precision.

Mitigating the need for redundant human resources.

- **Deployment Across Industries:**

Devised for profitable deployment across various industries.

- **Regulatory Compliance:**

Complies with regulatory requirements, specifically:

Implementation under the stipulations of US FDA's 21CFR Part 11: Electronic Records: Electronic Signatures.

Adherence to EU Annexure 11 for security.

c. REFERENCES:

- 21 CFR Part 11: Guidance for Industry, Electronic Records; Electronic Signatures
- EU GMP: Annex 11- Computerized Systems
- QA/073: Computerized system validation
- EPIQ 3.1.0. Operational Manual – Learn IQ

d. ATTACHMENTS:

- Technical agreement copy between Encube and Caliber (EPIQ Software supplier)
- Caliber EPIQ - Implementation Plan.
- The IT infrastructure requirement approved copy.
- Approved Caliber EPIQ evaluation summary.

5. USER SPECIFICATION REQUIREMENT:

5.1 FUNCTIONAL REQUIREMENTS:

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments if any	Encube Remarks/ Comments if any
5.1.1	Following modes should be available: Admin Mode, Learner Mode, Training mode.		
5.1.2	Once user is login in the system, the users shall assigned learner mode.		
5.1.3	Software shall display to do list, and set of SOPs (curriculum) which are applicable for his/her job role. Reports of individual users along with timelines for completion of individual action item in individual login of user.		
5.1.4	User information shall consist of below details: a) Name of employee b) Employee Code c) Designation d) Date of Joining e) Department f) Section g) Job role h) Reporting Manager		
5.1.5	To do list should contain following columns a) Title b) Document no./ Module no. if any c) Type of training d) Online/ Offline e) Questionnaire, Online/ Offline f) Due Date		
5.1.6	Types of trainings should be available in following types: a) Instructor led course b) SOP Training c) Offline training d) Annual Calendar Training		

USER REQUIREMENT SPECIFICATION

LEARN-IQ MODULE OF CALIBER EPIQ SOFTWARE						
Document No.	**Revision**	**Supersedes**	**Dated**	**Page**	**Total pages**	**Attachments**
EE/URS/23/022	00	NA	NA	7	21	

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments if any	Encube Remarks/ Comments if any
5.1.7	Report should be available in manners • Overall reports of all trainings • Reports for various types of trainings • Reports for various topics of trainings • Reports for sessions of trainings • Reports for users: Identified Users/ Under Progress Users/ Completed Users/ pending users/ registered users/ registered and attended users/ registered and not attended users. Filters must be available for reports. There should be facility for graphical representation of reports which will provide the idea of progress in trainings.		
5.1.8	There should be facility for generation of reports by individual users: To do list/ pending trainings/ completed trainings.		
5.1.9	To do list for users should be auto-generated from system as per defined job roles once any new user is created.		
5.1.10	As the curriculum is updated, the same shall be automatically displayed in the to-do-list of the employees.		
5.1.11	Against each training topic in the to do list of all user, the session details (date/ time/ duration/ venue/trainer. etc.) shall be displayed once any session is generated by the admin.		
5.1.12	There shall be facility on the dashboard for printing of training completion certificates and training reports.		
5.1.13	Questions shall be available in different types: • True/false • Fill in the blanks • Objective Types		

	.		
5.1.14	The provision of Random questionnaires facility shall be available		
5.1.15	System should capture correct data for time and date as per activity performed during that period (24 hours Format)		
5.1.16	System should have provision for sending E-mail notification to all users having E- Mail Ids of the particular training sessions.		
5.1.17	System admins at Encube end shall be able to update or modify custom fields.		
5.1.18	The system shall depict the training pendency on dashboards graphically.		
5.1.19	The system should have following options: • Register a new role • Set a global profile • Register a standard reason • Update reason status • Implement audit trails		
5.1.20	If User leaves the organization user shall be able to disable his learn IQ account. Once the account is made disabled training assigned to user shall be disabled.		
5.1.21	All Users shall be able to view all allocated task on dashboard and shall be able to view status of his / her allocated task.		
5.1.22	User shall be able to view status of the training status of SOP in percentage form.		
5.1.23	User shall be able to see his/her completed training in History section.		
5.1.24	User shall be able to electronic sign for attendance sheet.		
5.1.25	User shall be able to revise the curriculum as and when required		
5.1.26	The system should allow user to change the status of an existing document to inactive.		

5.1.27	Site Training Coordinator shall be able access details of user by using his/her employee code, user name.		
5.1.28	Site Training Coordinator shall be able to see locked user details. (Password locked).		
5.1.29	Site Training Coordinator shall get details on locked quizzes and Exams on dashboard		
5.1.30	Site Training Coordinator shall able to see below assignments: • Total ongoing assignments • At Risk • Not At Risk • Overdue		
5.1.31	Site Training Coordinator shall get total number of user active details on dashboard		
5.1.32	Site Training Coordinator shall get total number of user groups active details on dashboard		
5.1.33	Site Training Coordinator shall get total number of training items details on dashboard		
5.1.34	Site Training Coordinator shall get total number of curriculum details on dashboard		
5.1.35	Site Training Coordinator shall able to view classes for Offline Training (ILCs).		
5.1.36	Site Training Coordinator shall able to view completions for training items.		
5.1.37	Site Training Coordinator shall able to view completions for users.		
5.1.38	Site Training Coordinator shall able to view the current status of credit requests and credits granted for users.		

5.1.39	Site Training Coordinator shall able to view and filter on all versions of curricula and their details		
5.1.40	Site Training Coordinator shall be to view and filter on all versions of curricula and their details.		
5.1.41	Site Training Coordinator shall able to view all form incomplete assignment statuses by the user.		
5.1.42	Site Training Coordinator shall able to view training items within curricula and their related details		
5.1.43	Site Training Coordinator shall able to view training items and their related details.		
5.1.44	Site Training Coordinator shall able to view totals for completions and assignment status.		
5.1.45	Site Training Coordinator shall able to view the user groups, users and their related details.

5.2 DATA REQUIREMENTS:

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments if any	Encube Remarks/ Comments if any
5.2.1	**RECORD INSPECTABILITY:** The System allows to generate accurate and complete copies of electronic record in both human readable printouts and standard electronic format (e.g., PDF, MS Word, MS Excel, etc.) suitable for inspection, review and copying by the Regulatory agency.		
5.2.2	**RESTRICTED ACCESS:** The System shall restrict logical access to pre-authorized users.		
5.2.3	**UNIQUENESS OF CODES:** Each record generated in the system should have identification numbering or ID for easy traceability.		
5.2.4	**AUTHORITY CHECK:** The System shall be validated to ensure accuracy, reliability, and consistent intended performance.		
5.2.5	**INVALID RECORD DETECTION:** The system must be able to detect invalid records (such as invalid fields left blank that should contain data, values outside of limits and incorrect file formats, etc.) and pop-up must be generated for same before task completion.		
5.2.6	**VALIDATION:** The System shall be validated to ensure accuracy, reliability, and consistent intended performance.		
5.2.7	**BUSINESS CONTINUITY:** For the availability of computerized systems supporting critical processes, provisions should be made to ensure continuity of support for those processes in the event of a system breakdown (e.g., a manual or alternative system). The time required to bring the alternative arrangements into use should be based on risk and appropriate for a particular system and the business process it supports. These arrangements should be adequately documented and tested.

5.3 AUTOMATION & CONTROL REQUIREMENTS:

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.3.1	In case of power outrage or unforeseen shutdown of system, unsaved data should be automatically saved in system.		
5.3.2	User shall not be able to save, copy and paste the document from system repositories in any folder on the PC.		
5.3.3	Multiple search options shall be provided with document type, name, review period etc.		
5.3.4	Once the SOP is approved by QA, then the system shall notify on the training requirement. Also system shall have confirmation check on training completion before publishing of documents.		
5.3.5	The system should give alert for blank fields before electronically signing the completion of the task.		
5.3.6	System shall confirm that all pages are printed by printer in case breakdown of printing system and shall allow transfer of pending pages to alternate printer.		

5.4 INTERFACE & COMPATIBILITY

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.4.1	The interface should be user friendly and easy to understand		
5.4.2	The system shall integrate with AD to get required information. Like User ID, Password change.		
5.4.3	The system should be compatible with Microsoft outlook or other existing ERP systems like SAP HANA etc.		
5.4.4	The system should be compatible for its use on Hand Held Tabs, etc.

5.5 ENVIRONMENT CONDITION

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.5.1	Not Applicable	NA	NA

5.6 SOFTWARE REQUIREMENT

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.6.1	The application need to adhere to the 21 CFR part 11 requirements that define the various aspects of generation, management and maintenance of electronic records and usage of electronic signatures along with other security requirements.		
5.6.2	Only license version of software must be provided.		
5.6.3	There should not be any effect on the operation of software on installation of antivirus.		
5.6.4	The audit trail should be always ON and restricted to disable.		
5.6.5	The software shall automatically record actions that create, modify or delete the electronic records.		
5.6.6	The audit trial should be searchable, transferable electronically in human readable form and it should be printable.		

USER REQUIREMENT SPECIFICATION

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.6.7	The audit trail should be protected from intentional or accidental modification / deletion.		
5.6.8	The system shall keep a log of unauthorized attempts to access.		
5.6.9	User ID can be de-activated and reactivated.		
5.6.10	Password should be same as the Active Directory password System shall enforce idle session time-out of 600 seconds (10 minutes).		
5.6.11	System administration users shall have named accounts (rather than generic accounts such as admin)		
5.6.12	Software should force to change the password in first login.		
5.6.13	Software should force user to change password after defined interval. The interval shall be defined as per AD requirement.		
5.6.14	Software should detect the invalid login attempt and lock the user after 3 consecutive invalid attempts.		
5.6.15	Administrator should change / restore the password in case forgotten by user. (Software should force to change the password after login with reset password.)

5.7 QUALIFICATION AND VALIDATION REQUIREMENTS

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.7.1	All Documents should be supplied in English Language only		
5.7.2	Supplier shall provide Validation Plan, Functional Specification, Design Specification, IQ/ OQ/ PQ, Recommended standard operating procedures and training records, Validation Summary Report, Requirements Traceability Matrix.		
5.7.3	Software operation manual and any other test certificate shall be provided along with documentation.		
5.7.4	Training shall be given to the users by Caliber team.		
5.7.5	The supplier shall provide experienced staff to support qualification and validation activities according to GAMP5 and maintain training programs on cGMP approaches to Computer Systems Validation.		
5.7.6	Supplier shall provide 21 CFR - CSV assessement.		

5.8 BREAK DOWN HANDING AND BUSINESS CONTINUITY PLAN

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.8.1	The system shall have backup and recovery mechanism for any breakdowns as a business continuity plan.		
5.8.2	Back up to taken at regular intervals.		
5.8.3	Back-up data shall be stored for a predefined period at a separate and secure location.		
5.8.4	The OEM shall provide the required support for troubleshooting of the equipment during breakdown or disaster		

5.9 SECURITY REQUIREMENTS

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.9.1	The system shall not have generic user ID and guest accounts		
5.9.2	Software can be accessed by using combination of distinct User ID and Password only and the password shall be masked.		
5.9.3	No two-identical user ID can be created in System.		
5.9.4	Software should force to have complex Password only (combination of Alpha numeric and Special character)		
5.9.5	The system shall lock the user after defined unauthorized attempts		
5.9.6	Deletion of data must be restricted to all the users		
5.9.7	The system must auto logout after a certain pre-defined period		
5.9.8	The system must have system generated time electronic name stamped audit trail		
5.9.9	The system shall provide access as per user roles, user mapping etc.		
5.9.10	The system shall allow deactivation of users. Inactive accounts shall not be allowed to access the system.

5.10BACKUP AND RESTORATION REQUIREMENT

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.10.1	There shall be provision for data backup and restoration		
5.10.2	Automatic data backup shall be configurable in the system		
5.10.3	In situations of power and communication failure, the software shall be capable of assuring data consistency and preventing corruption.		
5.10.4	Electronic data shall be same in software (Soft data) and print (Hard data).		
5.10.5	During auto back-up any analysis in progress shall not get affected and data shall not be lost.		
5.10.6	The system shall be able to transfer the generated data from the computer system to the Encube server.		
5.10.7	The right for data backup and recovery shall be only with the administrator		
5.10.8	The system shall be able to find data in a way that enables archiving the data.		

5.11 ALARM HANDLING REQUIREMENTS

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.11.1	Not Applicable	NA	NA

5.12 UTILITY REQUIREMENT

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.12.1	Not Applicable	NA	NA

5.13 ELECTRONIC RECORD AND ELECTRONIC SIGNATURE REQUIREMENTS

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.13.1	The system shall create/process/transmit the following Electronic Records: Electronic Record name (Data log, Audit trail etc.)		
5.13.2	The system shall create, process and hold the following Electronic Signatures: Electronic Signature Name executed to Electronic Record Name		
5.13.3	The system shall generate full copies of Electronic Records in human readable format		
5.13.4	Electronic Records, including their associated audit trail and supporting meta-data shall be retained and remain available throughout their full retention period		
5.13.5	In the case that it is not intended to hold Electronic Records in the system throughout its whole retention period, the system shall have an archival mechanism whereby full copies of Electronic Records including their associated audit trail and supporting meta-data shall be transferred to an archive, and restored from that archive.		

USER REQUIREMENT SPECIFICATION

LEARN-IQ MODULE OF CALIBER EPIQ SOFTWARE						
Document No.	**Revision**	**Supersedes**	**Dated**	**Page**	**Total pages**	**Attachments**
EE/URS/23/022	00	NA	NA	19	21	

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.13.6	The system shall generate an audit trail of user actions (create, modify and delete) to Electronic Records that includes as a minimum date and time stamp of the user action, the user identity, the action taken including before and after values when relevant.		
5.13.7	In the case of changes to parameters of an Electronic Record that are critical to product quality, safety, efficacy or availability, the audit trail shall include a reason for the change		
5.13.8	Electronic signatures shall be linked to their respective Electronic Record and signatures cannot be removed, copied, or otherwise transferred to falsify an Electronic Record by ordinary means.		
5.13.9	An Electronic Signature shall include as a minimum the following information: The printed name of the signer; The meaning of the signature (such as initiated by, reviewed by, approved by, etc.)		
5.13.10	Electronic data should be accessible through application during operational and retention period.		
5.13.11	After initial login to a system (which required authentication using all components of a user's credentials), the system shall require user entry of at least one credential component (typically password) for each Electronic Signature execution.		
5.13.13	The audit trail shall be maintained at least as long as its respective electronic records in accordance to an approved procedure.		

5.14NON-FUNCTIONAL REQUIREMENTS:

Sr. No.	Requirement Description	Supplier's Remarks/ Commitments, If any	Encube Remarks/ Comments if any
5.14.1	The system shall support to concurrent users.		
5.14.2	The system shall be available 24 hours a day, 7 days a week (except during planned and unplanned network and/or system shutdowns) in accordance to an approved procedure.
